

ENVIRONMENT AND POWER POLICY

OUR PRODUCTS ARE:

- 100% recycled
- Fully environmentally friendly
- Food safe

OUR GLASS IS FREE OF:

- Heavy metals
- Parabens
- Plasticizers
- Substances with E numbers

One of the key elements of Trend Glass' strategy is concern for the environment, therefore, we are committed to ensure continuous improvement, providing resources and information, to set goals and make them happen, and to adhere to this environment and power policy:

WE MINIMIZE POWER CONSUMPTION:

- We use and invest in cutting edge manufacturing technologies with the intention to improve energy performance
- We control and manage: flue gases, electricity, water and raw materials
- We reuse waste glass which is a very important component of the finished product
- We use automated inspection and packaging of finished products
- We convert classic office equipment to energy-efficient systems: lighting, ventilation, air conditioning
- We maintain and improve our Energy Management System which obligates us to run our Organization in accordance with applicable laws and other requirements relevant to the use of energy
- By ensuring appropriate attention to energy aspects, we can make a conscious commitment to improve our energy performance, minimising our environmental impact and achieving better business results

WE REDUCE CO₂:

- We recycle cardboard and plastic packaging
- We reuse waste glass in our manufacturing process
- We sort all production and household waste

WE USE RENEWABLE ENERGY SOURCES:

- We find practical applications for production waste:
- Flue gases - we use the heat in heating systems in buildings
- Flue gases - we reuse energy in the melting process
- Wastewater - we cool down equipment with treated water
- We are preparing for a brownfield investment using solar energy - photovoltaic panels

WE COOPERATE WITH SUPPLIERS SUPPORTING ENVIRONMENT FRIENDLY ACTIONS, FOR EXAMPLE, BY THE CERTIFICATES: FSC, ISO14001, ISO50001
