

SUPPLY CHAIN SECURITY POLICY

The most important objective of the Organization is to manufacture products compliant with the highest quality and environmental standards and to deliver each product to its customer on time according to their requirements. It is equally important for our company to provide appropriate working conditions for our employees, and to offer them a place which favours personal development and ensures safety.

One of our priorities is to ensure a Safe Supply Chain and to improve it on a daily basis in accordance with accepted standards, customer requirements and legal regulations.

Thanks to innovative solutions, improvement of the employees' qualifications, compliance with legal regulations, customers' requirements and other market conditions, recognised as good business practices, we carry out production processes and ensure deliveries are made to customers according to the highest standards.

Early detection of any threats and supply chain risk assessment are additional advantages. The products we supply have been manufactured according to the highest quality and environmental requirements, with materials purchased only from reliable suppliers which have previously been audited by TREND GLASS.

Our combination of experience, competence of our employees and excellent technical solutions allows us to be confident that we remain effective in implementing adopted Supply Chain Security Policy.

The Supply Chain Security Policy is regularly monitored, updated and evaluated.
